This is a request for release of 130 acres of forest in the Devarayanadurga State Forest to one Shri T.D. Venkataramiah. There have been a number of applications for release of land in this forest area and consistently we have been rejecting all these requests on the ground that the percentage of forest in Tumkur District is low and that the area is required by the Forest Department itself for afforestation purposes. The petitioner requests for release of these lands with a specific purpose of raising cashewnut. Cashewnut cultivation requires an average rainfall of about 30" per annum and soil conditions which exist towards the west coast of Mysore. I do not know if the conditions in the D. State Forests are conducive to the cultivation of cashewnut in this area. Before we release any large areas of forest to provide individuals, it may be worthwhile for the Forest Dept. to take up cashewnut plantings on an experimental scale and then release the area after our experiments have ~~been~~ proved successful.

By encouraging me in this enterprise Govt. will be setting an example for other enthusiastic agriculturists to follow the lead. It is an easy means of effecting economic upliftment besides providing sufficient work for unemployed labour.
